

RESOLUTION NO. 2007- 343

**A RESOLUTION OF THE PIMA COUNTY BOARD OF SUPERVISORS IN
OPPOSITION TO CONSTRUCTION OF AN INTERSTATE HIGHWAY LINK
THAT BYPASSES TUCSON AND TRAVERSES PRISTINE AND INVALUABLE
SONORAN DESERT AREAS**

WHEREAS, Pima County's landmark Sonoran Desert Conservation Plan identifies 55 rare local species of concern, whose areas of habitat and corridors between habitat areas already are under threat from development; and

WHEREAS, Pima County has established a Sustainability Program that recognizes the detriment of petroleum-fueled car and truck travel to this effort because of their greenhouse-gas and pollutant emissions, and therefore calls for the County to shift its fleet to use alternative fuels; and

WHEREAS, since 1974 Pima County has bought more than 45,000 acres of land and assumed grazing leases on 86,000 acres for open-space and wildlife habitat preservation, and to mitigate impacts from development; and

WHEREAS, Pima County updated its Riparian Mitigation Ordinance in 2005 to avoid and minimize impacts to riparian vegetation along local washes; and

WHEREAS, the Arizona Department of Transportation (ADOT) has undertaken the Interstate 10 Phoenix-Tucson Bypass Study to look at alternative routes for new controlled access highways that Interstate 10 cars and trucks could use to bypass the Tucson and Phoenix metropolitan areas; and

WHEREAS, the study has advanced to the point of identifying two alternative routes which impact Pima County; and

WHEREAS, each of the alternatives would degrade the Sonoran Desert, sever wildlife corridors identified by the ADOT-sponsored "Arizona Wildlife Linkages Assessment," impede washes, open new areas to intense residential and commercial development far from existing urban centers, and thus encourage more car and truck travel at time when global warming and air pollution are growing concerns; and

WHEREAS, one of the alternatives would traverse the San Pedro River Valley impacting both Cochise County and Pima County; and

WHEREAS, the San Pedro River and its valley constitute one of the most biologically diverse and important ecosystems in North America, which also serves as vitally important flyway for hundreds of unique migratory bird species and is a sensitive aquatic and terrestrial wildlife corridor; and

WHEREAS, there are more than 500 known archaeological sites in the San Pedro River Valley, some dating back as much as 12,000 years and some considered sacred to Native American people; and

WHEREAS, a second identified route runs through the Avra Valley, negatively impacting Tucson Mountain Park, Saguaro National Park, Ironwood National Monument, Bureau of Reclamation's Central Arizona Project Canal mitigation area, and important elements of the County's Sonoran Desert Conservation Plan by slicing through sensitive areas, severing linkages between important habitat areas, and disturbing an unknown number of archeological sites; and

WHEREAS, the cost of building a new controlled-access highway would be enormous, requiring the acquisition of thousands of acres of new rights of way, expenditures on high and rapidly increasing costs of concrete and asphalt, putting a tremendous burden on taxpayers and future highway users; and

WHEREAS, the production of the millions of tons of concrete and asphalt for this massive construction project would cause significant air pollution and greenhouse gas emissions, as would the operation of heavy machinery in the construction process; and

WHEREAS, a new controlled-access highway near or through Pima County on any route, would promote urban sprawl, causing local governments to incur large financial responsibilities for new infrastructure costs and force major changes to existing county land-use and zoning designations; and

WHEREAS, a new controlled-access highway bypass would divert cars and trucks away from existing businesses that are dependent upon commerce generated from traffic on existing highways; and

WHEREAS, the state of Arizona could reduce highway traffic congestion, reduce the cost of highway maintenance, and save on the costs of rights of way purchases and concrete and asphalt production and installation – while reducing air pollution and greenhouse gas emissions – by instead expanding capacity and developing multi-modal transportation facilities in existing transportation corridors to sustainably accommodate projected increases in freight while providing for much-needed passenger rail traffic.

NOW, THEREFORE, BE IT RESOLVED that the Pima County Board of Supervisors:

1. Opposes the construction of any new highways in or around the County that have the stated purpose of bypassing the existing Interstate 10 as it is believed that the environmental, historic, archeological, and urban form impacts could not be adequately mitigated.

2. Supports the continuation of studies relating to this bypass such that the full costs of mitigation measures can be brought forth.
3. Calls upon the office of Governor Janet Napolitano to direct ADOT to undertake studies related to expanding capacity along Interstate 10 for multiple modes of travel including, but not limited to, freight, passenger cars, transit, intercity passenger rail, and bicycle, and for beautification of the existing corridor.

Passed by the Board of Supervisors of Pima County, this 18th day of December, 2007.

Chairman, Pima County Board of Supervisors

ATTEST:

Clerk of the Board

APPROVED AS TO FORM:

Deputy County Attorney
